1. Action Item: Approve May 2026 Meeting Minutes
2. Discussion Item: Roundtable with ISP – Ross Houck & Leila McNeill

Ross Houck and Leila McNeill attended the meeting to discuss CJIS requirements. Sarah Omundson requested an overview of what qualifies as CJIS data. CJI data is considered data from UCR or NCIC. It has to come from the FBI or CJI. If it is developed internally, even if FBI contains the same information, it is not considered CJIS. ISLETS has a security enhancement policy. Internal agency data is not necessarily CJI data, state data may be treated differently. ISP treats investigative data as CJI.

In general, much of the Court data shared with Insight is not CJI as much of it is publicly available, but PII is still protected. Criminal history records are protected, but criminal judgements are publicly available. Deidentified data is not CJI. The FBI is most concerned with their data.

Commission of Pardons and Parole and Department of Corrections are able to share internal dashboards with Insight. ITS has its own risk analysis related to data sharing and agencies are in ongoing conversations with ITS what constitutes CJI data.

3. Discussion Item: Updates on Current Projects
